Part III DETAILED ACTION

Claims 1-43 are currently pending.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6,22-27,32-38, drawn to first method and system for spatially profiling proteins, classified in class 703, subclass 12.
- II. Claims 7-18,28-32, 38-43, drawn to second method and system for spatially profiling proteins, classified in class 703, subclass 12.
- III. Claims 19-21, drawn to third method for spatially profiling proteins, classified in class 703, subclass 12.

Where inventions are related as disclosed but are distinct as claimed, restriction may be proper. (MPEP 806). The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I-III are drawn to independent and/or patentably distinct methods which have different steps and modes of operation: method of Group I does not require detecting centroid of protein and detecting distances therefor

Art Unit: 1631

as required for Groups II, III. Method of Group III requires step calculating moments of hydrophobicity distribution not required for Groups I,II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Species Requirement

Election of species should be required prior to a search on the merits in all applications containing both species claims and generic or Markush claims.(MPEP 808.01(a))

If Group I is elected, the following election of species is hereby required for the initial search for examination on merits:

The claims of Group are individually or dependently directed to a plurality of disclosed patentably distinct species of steps of determining hydrophobicity distribution, such as those specified in claims 4 and 5 (or 25 and 26), which require separate bibliographic, manual and computer search. Accordingly, regardless of

Art Unit: 1631

which group is elected, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

To be complete, a response to the election of species requirement should include a proper election along with a listing of all claims readable thereon, including any claims subsequently added. MPEP 809.02(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (703) 305-4506. Dr. Borin can normally be reached between the hours of 8:30 A.M. to 5:00 P.M. EST Monday to Friday. If attempts to reach the examiner by telephone are
